# Acel

10 - Site Equipment

## Acel part number AC0276

## Quick-Cone 16-30.5mm

Uninterrupted, ground cutting edges rapidly produce an infinite range of hole diameters for ultimate versatility.

Tapered cone design for easily enlarging holes, perfect for problem solving and awkward jobs.

Self Centring drilling action provides a quick & easy trade solution for metal drilling.

Made in Sheffield.

Quick-Cone can be used in: Sheet steel, Non-ferrous metals, Plastics, Formica, Plywood

Quick-Cone is ideal for:

Metal enclosures, trunking, cabinets, cladding, switch-gear etc.

Easily opening up existing holes.

Jobs which require  specific tools with diameters suitable for ISO threads and clearance holes.

Applications where many different diameters are reqiured which are available on one tool.

| Technical Specification | |
|---|---|
| Diameter | 16-30.5mm |
| Typical Applications | Finishing size is international standard hole size for push buttons and indicator lights |
| Max Material Thickness | 2mm |
| Start Diameter | 16mm |

**10-AC0276-2021-V1**
