## Acel part number AC0425

## Cobalt Vari-Pitch Holesaw

The ultimate multi-purpose holesaw with 8% cobalt for longer life.

Stronger flex-free body construction is designed with high alloy content for structural integrity and tool dependability.

Teeth are manufactured with M42 superior steel featuring 8% Cobalt which provides excellent wear resistance at higher drilling temperatures for extended tool life.

Variable pitch cutting teeth combine an aggressive cut for increased spoil removal with a smoother cut for reduced vibration. This allows the holesaws to benefit from both increased cutting speed and tool durability.

Irregular depth clearance gullets avoid trapped spoil by providing a more efficient chip clearance meaning teeth stay sharper for longer.

CVP Holesaws can be used in: Steel, Stainless steel, Non-ferrous, Wood, Plastics, MDF.

| Technical Specification | |
|---|---|
| Diameter | 22mm |
| Working Length | 38mm |
| Overall Length | 50mm |
