PH2 75mm Driver Bits - 5pce

5 piece multi-packs of 75mm Impact Bits within handy Tic-Tac dispensers.

Impact rated for use within impact drivers.

¼" quick-change shank means tools can be interchanged rapidly for the ultimate convenience.

S2 steel specification for added bit durability combined with the optimum heat treatment provides the ideal balance between strength and flex.

75mm extra length bits allow versatility when working with difficult to reach screws, such as screws deeply embedded in timber.

Torsion portion design features a reduced diameter which allows the bit to temporarily flex under high torque loads, absorbing torque peaks, to reduce stress at the bit tip and help protect from damage.

Colour coded for hassle free easy bit selection.

Technical Specification

10-AC04804-2021-V1
