AC05511

Dual Non Contact Voltage Tester

Clearly detects 90-600 volts AC without metal contact.

Unique system providing two levels of sensitivity:
1. Common non contact voltage detection
2. Holding the attenuation button enables the tester to indicate between live and dead cables only millimeters apart.

Two colour LEDs - Green for correct working and Red for voltage detection.

Two tone buzzer, one for correct working and one for voltage detection.

Tip glows red when voltage is detected.

Low power consumption circuits means long life batteries.

Pocket-size for handy use anywhere.

CAT IV rated.
