

Acel

10 - Site Equipment

Acel part number AC0277

Quick-Cone 25-40mm

Uninterrupted, ground cutting edges rapidly produce an infinite range of hole diameters for ultimate versatility.

Tapered cone design for easily enlarging holes, perfect for problem solving and awkward jobs.

Self Centring drilling action provides a quick & easy trade solution for metal drilling.

Made in Sheffield.

Quick-Cone can be used in: Sheet steel, Non-ferrous metals, Plastics, Formica, Plywood

Quick-Cone is ideal for:

Metal enclosures, trunking, cabinets, cladding, switch-gear etc.

Easily opening up existing holes.

Jobs which require specific tools with diameters suitable for ISO threads and clearance holes.

Applications where many different diameters are required which are available on one tool.

Technical Specification

Diameter 25-40mm

Typical Applications General purpose

Max Material Thickness 2mm

Start Diameter 25mm

10-AC0277-2021-V1
