

Acel part number AC0305

SDS Plus Hammer Drill Bit

The professional standard for multiple hole drilling in masonry materials using an SDS Plus Machine.

Hammer Grade Carbide Tip - Hammer grade tungsten carbide tip gives extended life in the hardest masonry materials.

Copper Brazed to 1100c - Furnace brazing process uses a copper braze heated to 1100c giving the ultimate bond between body and tip, allowing the drill bit to withstand greater pressure and produce a greater number of holes.

Precision Machining - Tip insertion is secured using purpose made machines operating to pre-set specifications & tolerances, ensuring a consistently accurate and perfectly centralised tip for rounder holes.

SDS Plus can be used in:

- Heavy duty concrete
- General concrete
- Hard bricks
- Soft bricks
- Lightweight blocks
- Natural stone
- Constructional granite
- Limestone

10-AC0305-2021-V1

Technical Specification

6.0mm Diameter	100mm Working Length
	160mm Overall Length
