## SDS Plus Hammer Drill Bit

The professional standard for multiple hole drilling in masonry materials using an SDS Plus Machine.

Hammer Grade Carbide Tip - Hammer grade tungsten carbide tip gives extended life in the hardest masonry materials.

Copper Brazed to 1100oc - Furnace brazing process uses a copper braze heated to 1100oc giving the ultimate bond between body and tip, allowing the drill bit to withstand greater pressure and produce a greater number of holes.

Precision Machining - Tip insertion is secured using purpose made machines operating to pre-set specifications & tolerances, ensuring a consistently accurate and perfectly centralised tip for rounder holes.

SDS Plus can be used in:

Heavy duty concrete
General concrete
Hard bricks
Soft bricks
Lightweight blocks
Natural stone
Constructional granite
Limestone
