

10 - Site Equipment

	Acel part number AC0395
	Acceler8% MAX Holesaw
	Acceler8% MAX cutters are ideal when working on metal enclosures, trunking, cabinets, structural steelwork and pipework.
	Drills up to 350 holes in stainless steel & tough alloys*
	Special tungsten carbide teeth provide excellent wear and heat resistance.
	One piece construction - no assembly is required and enables accurate drilling.
Technical Specification	Safety collar stop prevents over penetration for safer, faster operation.
25.0mm Diameter 5mm Working Length	Ejector spring ejects the slug for hassle free drilling.
	3mm Hex Key included with replacement springs and pilot drills available to keep your cutter in use for longer.
	*Testing carried out in 2mm thick stainless steel at correct recommended speed and using cutting compound.
	Short Series drills steel up to 5mm thick.
	Can be used in mild steel, stainless steel, steel
	10-AC0395-2021-V1
