Acel part number AC0431

Cobalt Vari-Pitch Holesaw

The ultimate multi-purpose holesaw with 8% cobalt for longer life.

Stronger flex-free body construction is designed with high alloy content for structural integrity and tool dependability.

Teeth are manufactured with M42 superior steel featuring 8% Cobalt which provides excellent wear resistance at higher drilling temperatures for extended tool life.

Variable pitch cutting teeth combine an aggressive cut for increased spoil removal with a smoother cut for reduced vibration. This allows the holesaws to benefit from both increased cutting speed and tool durability.

Irregular depth clearance gullets avoid trapped spoil by providing a more efficient chip clearance meaning teeth stay sharper for longer.

CVP Holesaws can be used in: Steel, Stainless steel, Non-ferrous, Wood, Plastics, MDF.

Technical Specification	
Diameter	51mm
Working Length	38mm
Overall Length	42mm

10-AC0431-2021-V1
