Adjustable Hole Cutter

The flexible tool for creating downlighter holes

The adjustable width blades allow users to benefit from a cutting diameter range spanning from 40 - 203mm on just one tool. This reduces the need to carry a holesaw for every size giving a great cost effective solution.

The product also provides protection from falling debris making it a more efficient and hassle-free drilling experience.

Adjustable width HSS cutting blades can be altered to cut between 40-203mm for the ultimate flexibility.

Twin cutting blades provide balanced cutting, reducing the risk of a damaged hole and giving more user comfort.

Silicone rubber ring resists perishing which keeps the cutter clean and prevents ceiling marks.

Impact resistant dust shield provides protection from failing debris.

Sealed ball bearing provides smoother cutting and less vibration.
