MCB TOGGLE LOCK

Possibly the simplest yet most versatile MCB lockout to use. Gives a low profile solution allowing the panel door to close with padlock fitted.

The CB12 "Toggle Lock" simply fits over the MCB toggle, using a small flat screw driver, tighten the internal grub screw to secure the CB12 onto the toggle.

Once tight and secure, insert your padlock which blocks access to the grub screw so the device cannot be removed or toggle operated until the lock is removed.

Technical Specification

Colour	Brass
Material	Aluminium
Country of Origin	China
Hole Dimension	To fit a standard 6.4mm (1/4 inch) safety padlock
