

Technical Specification	
Colour	Silver
Shelf Lif <mark>e</mark>	24 months

Limitations - Chemical Resistance

Water, seawater, aliphatic solvents, oils, greases, diluted organic acids. Practically no dirt attachment.

Esters, Ketones, Aromatics, chlorine for swimming pools chlorinated solvents.

Concentrated Acids

AC0932

OB1 Sealant & Adhesive -Silver

• Bonds all metals even lead. Also bonds plastics including PVC & GRP and more materials including glass, mirror, polystyrene, fibreglass & wood. Works in water. Features zero VOCs.

- In harsh conditions it maintains its robust bond when cured from -40° C to $+120^{\circ}$ C
- Perfect solution for use in kitchens and food
 preparation areas
- Ideal sealant for under water applications even
 resistant to saltwater
- For instant repair or bonding with carbon fibre materials, fibreglass and GRP
- Allows flexible adhesion that can move with the expansion and contraction of metal and steel
- Contains no solvents, is odourless and kind to the environment
- Contain no solvents so will never crack, shrink or collapse, creating a permanent seal/bond
- Contains no solvents or isocyanates so it will not degrade the back of mirrors
- Features Zero VOC's so it cures solid with no holes where bacteria can breed resulting in mould
- Perfect for roofing applications, seals, grips and fills lead flashings to stone, brick and felt

10-AC0932-2022-V1
