

## AC2854

## STORM Cable glands

BS EN 624444:2013 Fast Fit No Shroud Multiple Cable Types Non-Corrosive UV Stabilised Zero Halogen

| Technical Specification |                 |
|-------------------------|-----------------|
| Gland Size              | 20              |
| Cable Diameter          | 15.5mm - 21.0mm |
| Temperature Rating      | -20C to +80C    |
| Ingress Protection      | IP68            |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
|                         |                 |
