

AC66388

8.0m PipeGuard 107W

Designed to prevent frozen condensate pipes in the most extreme conditions, PipeGuard is a simple to fit solution which stops frozen, cracked and damaged pipes and ensures water keeps flowing down to -25°C.

Once installed PipeGuard automatically ensures heat is applied to the pipe when the temperature drops close to freezing, and switches off again to save energy once the pipe has reached a safe temperature.

Once the unit is installed no maintenance is required and with its 10 Year Warranty you can be confident it will protect your pipes through the worst the British weather has to throw at us.

Technical Specification	
Size	8.0m
Output	107W
Start up temperature	3°C
Cutout temperature	13°C
Earth protection	100% earth shielded
Supply Voltage	230V +/- 10%
IP Rating	IPX7
Insulation	Expanded low density polyethelene
Coldtail Lead	1.35m
Sensor	Integrated thermal sensor
Manufactured In	India

- A ready made unit, simply connect to power supply
- Simple to install, can be quickly zip-tied in place
- Integrated thermostat to ensure energy efficiency
- Monitors pipe temperature reducing running costs
- Developed for use in extreme Scandinavian winter conditions
- Maintenance free
- Resistant to moisture, vibration and ageing
- No thermostat required
- Fully earthed for electrical safety
- 10 year Warranty
